Test Cases 10

C11: Enter an invalid password in the authorization field

Type	Priority	Estimate	References
Security	Critical	None	None
Automation Type			
None			

Preconditions

1. Install the Privat24 mobile application on a mobile device
2. Connect the device to the Internet.
3. A user registered in the Privat24 application.

Steps

1	Launch the application	The "Session recovery" page should open containing the "Enter password" field.
2	Enter a password that is not registered in the system. Tap "Continue".	Below the password input field, a message should be displayed in red text: "Incorrect password entered".

C12: Enter a valid password in the authorization field

Type	Priority	Estimate	References
Security	Critical	None	None
Automation Type			
None			

Preconditions

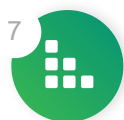

1. Install the Privat24 mobile application on a mobile device
2. Connect the device to the Internet.
3. A user registered in the Privat24 application.

Steps

1	Launch the application	The "Session recovery" page should open containing the "Enter password" field.
2	Enter a password that is registered in the system. Tap "Continue".	The "Wallet" page should open with the user's cards displayed.

C13: Create a payment from an active card

Type	Priority	Estimate	References
Functional	Critical	None	None
Automation Type			
None			

Preconditions

- 1. Install the Privat24 mobile application on a mobile device
- 2. Connect the device to the Internet.
- 3. A user registered in the Privat24 application.
- 4. Launch the application.

Steps

1	Tap "Services" in the footer.	A list of categories opens.
2	Select the "Transfer" category. On the new page, select "Transfer to a card" from the list.	The payment formation page should open.
3	Select the active card from which the payment will be made by swiping left/right. The card has to have funds on it.	The selected card should be placed in the center of the row.
4	Write the number of the active card, the recipient of funds.	Data about the recipient's card payment system should appear in the input field on the left.
5	Enter the transfer amount not more than the funds in the account, and tap "Continue".	A page should appear with the data of the recipient cardholder and the amount of the transfer along with the commission.
